Herbst Attendance

**Control, monitor and record
all activities within one
simple software solution**

Herbst Attendance Hardware Options

HAND HELD POCKET DEVICE

Input allows and offsite manager to clock in staff designated to him, or an individual to clock in and out of work. Information sent back to main server in real-time.

A particularly useful solution for employees who work in a different locations on a daily basis as comments and details of their activity can also be entered.

Hardware clock devices need not only be restricted to Networks (LANS). Herbst Attendance supports devices which work on employee buses/vans and remote or temporary sites. Sending the information in real-time (reliable built in GPRS technology) back to a centralised management interface.

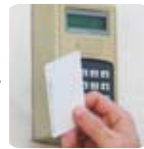

BIOMETRIC FINGERPRINT READER

A fast, reliable performance combined with affordability. Fastest fingerprint-matching algorithm in the industry with photo-capture technology.

PROXIMITY CARD INPUT

Information sent straight to main server in real-time.

WEBSITE INPUT

Employees clock in and out of work on their PC. Information sent straight to main server in real-time.

Herbst Attendance easy to use software is suitable for a company from 5 employees right up to an organisation with 30 locations and multiple clocking devices in each location.
